

When your child has mastered one set of math facts, which means s/he is able to easily complete a strip of 20 facts in one minute with ease, you only need to send in one blue slip.

For Example:

When +3 is mastered, fill out one blue slip, send it back to school, and move onto +4. You don't need to send multiple blue slips for the same set of facts.

---

My son/daughter Travis has passed off +3 in 60 seconds or less with 100% accuracy.

Parent Signature, Surge Smith Date 8-23-19
